Goldman Sachs Developer

Unlock Global Markets Through Our Institutional Developer Platform

What is Goldman Sachs Developer?

Goldman Sachs Developer is a new platform designed to externalize solutions and products created by Goldman Sachs engineers.

Institutional APIs

Developer offers access to a comprehensive set of APIs, unlocking access to global markets across asset classes. These APIs are designed for developers to create secure, scalable solutions which cover the full investment process, from idea generation to trade execution and risk management.

Developer Tools

Compress time to market and create efficient, automated solutions with sophisticated tools trusted by Goldman Sachs traders, quants, and technologists. Leverage our unique data, quantitative finance toolkit, and advanced trading analytics to accelerate development.

Cross-Asset Platform

Designed from the ground up to provide intuitive cross-asset services for developers to rapidly integrate with our data, pricing models, and liquidity in a modular way. Access the same platform used by Goldman Sachs developers to navigate markets at scale.

Goldman Sachs Developer Highlights

GS Quant	Risk Services	Data Services
A python software development toolkit (SDK) that gives clients access to data and risk management powered by SecDb	The same cross-asset pricing models used by Goldman Sachs trading desks, refined over 25 years by our traders and quantitative analysts, and calibrated to manage risk with precision at scale	A full catalog of research, market, execution, and other unique datasets for use in quantitative strategies or pricing and risk calculations

We believe developers will create the future of institutional finance. We want to power this transformation.
