

April 2008

Market Overview

Goldman Sachs Dynamic Opportunities Limited ("GSDO" or the "Fund") returned 0.29% net¹ in the month of April (for the USD share class).

Twelve out of twenty managers in the portfolio posted positive returns.

Two out of three Relative Value managers finished the month positive. Fixed income strategies were the strongest contributors as several positions recovered following losses in March. Equity market neutral strategies also generated positive returns, driven in part by valuation factors. Emerging markets saw mixed results, particularly in countries such as Turkey and South Africa. Short credit and long volatility positions detracted from returns. A multi-strategy manager experienced gains in commodities, credit, fixed income, reinsurance and structured finance which more than offset losses in equity strategies, equity derivatives and macro hedges. Another manager focused on Asian volatility detracted from returns as volatility levels retracted globally.

Five out of seven Event Driven managers generated positive performance in April. Some of our managers benefited from a rally in credit markets with leveraged loans broadly trading up on the month. Managers with exposure to merger related situations also profited as spreads on select leveraged buyout deals tightened during the month. Long-biased equity exposure, particularly in the energy, commodity, and financial sectors, was also rewarded. Managers who were defensively positioned did not benefit from the broad market rally and portfolio hedges proved to be a key detractor as credit spreads tightened and volatility decreased during the month. One manager generated gains on the back of long exposure to the bank loan market. Another manager detracted from portfolio performance as positions weakened amidst tightening credit conditions.

Four out of seven Equity Long/Short managers generated positive performance. Managers posted mixed results in April as some benefited from the strong performance of equity markets globally, while others detracted due to lower levels of net exposure and losses on portfolio hedges. Some positively-performing managers had exposure to emerging markets, technology, energy, and growth equities. One European manager generated positive returns through exposure in the European retail and telecommunications industry, while stocks in healthcare and technology detracted. A diversified global manager detracted from performance due to portfolio hedges and exposure to financials.

Two out of three Tactical Trading managers experienced negative returns. Fundamental commodity exposure contributed to returns on the back of broad commodity rallies, with most gains concentrated in agriculture and energy. While this exposure to commodities accounted for the majority of gains in April, they were more than offset by losses in U.S. fixed income and currency trading. One manager experienced mixed performance as equities posted small gains driven by emerging markets exposure, while the fixed income and foreign exchange portfolio were detractors driven by yield curve steepeners and long European currencies exposure.

Please note that one manager from each of the four sectors was redeemed at the end of March 2008. The proceeds were used to allocate to two managers in the Event Driven sector and one new manager in each of the Equity Long/Short and Tactical Trading sectors. In addition, TPG-Axon was reclassified from Event Driven to Equity Long/Short.

¹ Does not include cash. The Investment Manager may change the allocations over time. The allocations noted above should not be deemed representative of allocations in the future. Allocations based upon month-end valuations as of 30/04/2008, calculated as of 30/05/2008. Figures may not sum to 100% due to rounding.

² Performance is final and unaudited. The figures published here are final as of 30/04/2008, calculated as of 30/05/2008, but are potentially subject to revision.

³ Contribution data is geometrically calculated based on a monthly time series. Data will not arithmetically sum to fund total. Cumulative geometric returns for less than 12 months are calculated as follows: $(1+r_1)^*(1+r_2)^*...*(1+r_m)-1$. Annualized geometric returns for returns greater than 12 months are calculated as follows: $[(1+r_1)^*(1+r_2)^*...*(1+r_m)]^{1/2m}-1$.

⁴ Sector and overall returns are net of underlying manager fees but gross of Goldman Sachs management and incentive fees. Presented in USD unless otherwise stated.

⁵ Returns less than 12 months are cumulative, not annualized.

Disclosures

Opinions and views expressed are current opinions as of the date appearing in this material only. No part of this material may be i) copied, photocopied or duplicated in any form, by any means; or ii) redistributed without the prior written consent of Goldman Sachs Hedge Fund Strategies LLC.

This report does not form part of, and must not be used for the purposes of, any offering of shares in the Fund.

This material has been prepared by Goldman Sachs Asset Management (GSAM) and/or Goldman Sachs International (GSI) and is not a product of the Goldman Sachs Global Investment Research (GIR) Department. The views and opinions expressed may differ from those of the GIR Department or other departments or divisions of Goldman Sachs and its affiliates. Investors are urged to consult with their financial advisors before buying or selling any securities. This information may not be current and neither GSAM nor GSI has an obligation to provide any updates or changes.

References to market or composite indices, benchmarks or other measures of relative market performance over a specified period of time (each, an "index") are provided for your information only. References to the indices does not imply that the portfolio will achieve returns, volatility or other results similar to the indices. The composition of the indices may not reflect the manner in which a portfolio is constructed in relation to expected or achieved returns, portfolio guidelines, restrictions, sectors, correlations, concentrations, volatility or tracking error targets, all of which are subject to change over time. Information regarding portfolio objectives is contained in the prospectus as amended from time to time. Source for index data: Bloomberg.

Indices are unmanaged. The figures for the index reflect the reinvestment of dividends but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

Effect of fees on performance:

The following table provides a simplified example of the effect of management and incentive fees on portfolio returns. For example, assume a portfolio has a steady investment return, gross of fees, of 0.5% per month and total management fees of 0.1250% per month of the market value of the portfolio on the last day of the month and incentive fees of 10% of net profits. Management fees and incentive fees are deducted from the market value of the portfolio on that day. There are no cash flows during the period. The table shows that, assuming that other factors such as investment return and fees remain constant, the difference increases due to the compounding effect over time. Of course, the magnitude of the difference between gross-of-fee and net-of-fee returns will depend on a variety of factors, and the example has been intentionally simplified.

Period	Gross Return	Net Return	Differential
1 year	6.17%	4.13%	2.04%
2 years	12.72%	8.42%	4.29%
10 years	81.94%	9.83%	32.11%

MSCI World Index: Morgan Stanley Capital International's market capitalization weighted index is composed of companies representative of the market structure of 22 developed market countries in North America, Europe, and the Asia/Pacific Region. The index is calculated without dividends, with net or with gross dividends reinvested, in both US dollars and local currencies.

Lehman Brothers Aggregate Index: The index is composed of securities from Lehman Brothers Government/Corporate Bond Index, Mortgage-Backed Securities Index, and the Asset-Backed Securities Index. The index's total return consists of price appreciation/depreciation plus income as a percentage of the original investment. Indices are rebalanced monthly by market capitalization.

Supplemental Risk Disclosure for All Potential Investors in Hedge Funds and other private investment funds (collectively, "Alternative Investments")

In connection with your consideration of a direct or indirect investment in any Alternative Investment, you should be aware of the following risks:

Alternative Investments are not subject to the same regulatory requirements or governmental oversight as mutual funds. The sponsor or manager of any Alternative Investment may not be registered with any governmental agency.

Alternative Investments often engage in leverage and other investment practices that are extremely speculative and involve a high degree of risk. Such practices may increase the volatility of performance and the risk of investment loss, including the loss of the entire amount that is invested.

Alternative Investments may purchase instruments that are traded on exchanges located outside the United States that are "principal markets" and are subject to the risk that the counterparty will not perform with respect to contracts. Furthermore, since there is generally less government supervision and regulation of foreign exchanges, Alternative Investments are also subject to the risk of the failure of the exchanges and there may be a higher risk of financial irregularities and/or lack of appropriate risk monitoring and controls.

Past performance is not a guide to future performance and the value of Alternative Investments and the income derived from them can go down as well as up. Future returns are not guaranteed and a loss of principal may occur.

Alternative Investments may impose significant fees, including incentive fees that are based upon a percentage of the realized and unrealized gains, and such fees may offset all or a significant portion of such Alternative Investment's trading profits.

Alternative Investments are offered in reliance upon an exemption from registration under the Securities Act of 1933, as amended, for offers and sales of securities that do not involve a public offering in the United States.

Alternative Investments may themselves invest in instruments that may be highly illiquid and extremely difficult to value. This also may limit your ability to transfer your investment.

Alternative Investments generally are not required to provide their investors with periodic pricing or valuation information.

There may be conflicts of interest between the Alternative Investment and other service providers, including the investment manager and sponsor of the Alternative Investment.

Alternative Investments may involve complex tax and legal structures. Investment in any particular Alternative Investment, or Alternative Investments generally, is only suitable for sophisticated investors for whom such an investment does not constitute a complete investment program and who fully understand and are willing to assume the risks involved in such Alternative Investment. You are urged to consult with your own tax, accounting and legal advisers regarding any investment in any Alternative Investment.

Investors are also urged to take appropriate advice regarding any applicable legal requirements and any applicable taxation and exchange control regulations in the country of their citizenship, residence or domicile which may be relevant to the subscription, purchase, holding, exchange, redemption or disposal of any Alternative Investment.

We refer you to the prospectus for a more complete discussion of the risks relating to an investment in any particular Alternative Investment. You are urged to read all applicable offering materials, including the entire prospectus, prior to any investment in any Alternative Investment. Investment Restrictions apply to many of Goldman Sachs' Alternative Investments. Goldman Sachs Hedge Fund Strategies LLC (HFS) is the Investment Manager to the Fund referenced herein. HFS, a US registered investment adviser, is part of Goldman Sachs Asset Management and is a wholly owned subsidiary of The Goldman Sachs Group, Inc.

There may be conflicts of interest relating to the Fund and its service providers, including Goldman Sachs and its affiliates, who are engaged in businesses and have interests other than that of managing, distributing and otherwise providing services to the Fund. These activities and interests include potential multiple advisory, transactional and financial and other interests in securities and instruments that may be purchased or sold by the Fund, or in other investment vehicles that may purchase or sell such securities and instruments. These are considerations of which investors in the Fund should be aware. Additional information relating to these conflicts is set forth in the latest prospectus for the Fund.

This document has been communicated outside of the United States by Goldman Sachs International, Peterborough Court, 133 Fleet Street, London, EC4A 2BB, authorised and regulated by the Financial Services Authority.

This report may also be communicated in the United Kingdom by Goldman Sachs Asset Management International which is authorised and regulated by the Financial Services Authority (FSA).

Prospective investors should inform themselves as to any applicable legal requirements and taxation and exchange control regulations in the countries of their citizenship, residence or domicile which might be relevant.

Investors should consider that the returns that they will receive will be a function of the share price of the Fund. While we would expect that the Fund would trade substantially in line with its underlying NAV, investors should consider that the traded status of the Fund could lead it to have a significantly higher volatility and correlation to equities.

Investors should consider that the liquidity of their investment will be a function of the market demand for the shares of the Fund. There is the potential for the Fund to trade at a discount to NAV and lack of market demand may lead to their being a less liquid market.
