

February 2009

Market Overview

Goldman Sachs Dynamic Opportunities Limited's ("GSDO" or the "Fund") underlying investments were marginally positive in February (US Dollar, net of fees) continuing the positive start into 2009.

Four of the eight managers in the Event Driven sector ended the month positively. Overall, Event Driven strategies outperformed equity markets in February as most managers continued to have little directional exposure to equities. Conditions in the credit markets were significantly better than those in the equity markets as high yield bonds and leveraged loans traded flat to slightly down during the month. Several managers in the portfolio have benefited from an increased allocation to credit-oriented strategies. Merger arbitrage continued to be a relatively small exposure given the diminished level of corporate activity. Despite this, a few managers were able to generate positive returns from select merger spreads. Broadly, Event Driven managers continue to be defensively positioned and have cash on hand to allocate to attractive situations and securities as opportunities arise.

Three of the Fund's five managers in the Equity Long/Short sector ended the month positively. In general, Equity Long/Short strategies outperformed global equity markets in February, which realized double digit losses on the month. Similar to January, equity managers generated meaningful gains from their short books, particularly in the financials, REITs, and cyclical/industrials sectors. While their long books mostly detracted, select telecom, media, technology, and special situations equities names contributed to returns. Managers with long exposure to the financials, energy, materials, and industrials sectors experienced the largest losses, while managers with the highest levels of net long exposure also tended to detract.

Although Tactical Trading managers generally experienced mixed performance in February, two of the four Tactical Trading managers in GSDO generated positive returns. In the macro space, currencies drove much of the returns, with some managers benefiting from short euro positioning against select currencies and others negatively impacted by positions in the Japanese yen. The trend following manager in the Fund experienced negative performance for the month of February with long grains and beans positions being the main detractors. However, this manager continues to run at lower than normal risk levels as volatility across markets persists, and trades with predominantly directional bets across the commodities complex.

¹ The Relative Value allocation is a single allocation to a Core manager. Does not include cash. The Investment Manager may change the allocations over time. The allocations noted above should not be deemed representative of allocations in the future. Allocations based upon month-end valuations as of 27/02/2009, calculated as of 31/03/2009. Figures may not sum to 100% due to rounding.

² Performance is final and unaudited. The figures published here are final as of 27/02/2009, calculated as of 31/03/2009, but are potentially subject to revision.

³ Contribution data is geometrically calculated based on a monthly time series. Data will not arithmetically sum to fund total. Cumulative geometric returns for less than 12 months are calculated as follows: $(1+r_1)(1+r_2)\dots(1+r_n)-1$. Annualized geometric returns for returns greater than 12 months are calculated as follows: $[(1+r_1)(1+r_2)\dots(1+r_m)]^{12/m}-1$.

⁴ Sector and overall returns are net of underlying manager fees but gross of Goldman Sachs management and incentive fees. Presented in USD unless otherwise stated.

⁵ Returns less than 12 months are cumulative, not annualized.

² This is a list of all GSDO managers excluding Amaranth and Tisbury. Amaranth and Tisbury have been excluded because each is a holding (a) that comprises less than 1% of GSDO's assets and (b) from which GSDO has submitted a full redemption form. The list is subject to change without notice to investors and therefore may not be an indication of the investments that currently comprise the Fund's portfolio. **Please see Disclosures for important information.**

Opinions and views expressed are current opinions as of the date appearing in this material only. No part of this material may be i) copied, photocopied or duplicated in any form, by any means; or ii) redistributed without the prior written consent of Goldman Sachs Hedge Fund Strategies LLC.

The performance described herein is based in part on estimates of the recovery value of such fund's assets currently held at Lehman Brothers and/or amounts owed to such fund by Lehman Brothers. In addition, these exposures are based on information we have received from the majority, but not all of our underlying hedge fund managers, and we have no way of independently verifying or otherwise confirming the accuracy of the information provided. There can be no guarantee that our estimate is accurate. There is significant uncertainty with respect to the ultimate outcome of the Lehman Brothers insolvency proceedings, and therefore the amounts ultimately recovered from Lehman Brothers could be materially different than our estimates. Accordingly, the estimated values set forth herein may not completely reflect the impact of potential losses. When realized, such losses could adversely impact the performance of the fund. We continue to assess our funds' exposure to the bankruptcy of Lehman Brothers and we may revise our estimates of recovery value at any time.

This report does not form part of, and must not be used for the purposes of, any offering of shares in the Fund.

This material has been prepared by Goldman Sachs Asset Management (GSAM) and/or Goldman Sachs International (GSI) and is not a product of the Goldman Sachs Global Investment Research (GIR) Department. The views and opinions expressed may differ from those of the GIR Department or other departments or divisions of Goldman Sachs and its affiliates. Investors are urged to consult with their financial advisors before buying or selling any securities. This information may not be current and neither GSAM nor GSI has an obligation to provide any updates or changes.

References to market or composite indices, benchmarks or other measures of relative market performance over a specified period of time (each, an "index") are provided for your information only. References to the indices does not imply that the portfolio will achieve returns, volatility or other results similar to the indices. The composition of the indices may not reflect the manner in which a portfolio is constructed in relation to expected or achieved returns, portfolio guidelines, restrictions, sectors, correlations, concentrations, volatility or tracking error targets, all of which are subject to change over time. Information regarding portfolio objectives is contained in the prospectus as amended from time to time. Source for index data: Bloomberg.

Indices are unmanaged. The figures for the index reflect the reinvestment of dividends but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

Effect of fees on performance:

The following table provides a simplified example of the effect of management and incentive fees on portfolio returns. For example, assume a portfolio has a steady investment return, gross of fees, of 0.5% per month and total management fees of 0.1250% per month of the market value of the portfolio on the last day of the month and incentive fees of 10% of net profits. Management fees and incentive fees are deducted from the market value of the portfolio on that day. There are no cash flows during the period. The table shows that, assuming that other factors such as investment return and fees remain constant, the difference increases due to the compounding effect over time. Of course, the magnitude of the difference between gross-of-fee and net-of-fee returns will depend on a variety of factors, and the example has been intentionally simplified.

Period	Gross Return	Net Return	Differential
1 year	6.17%	4.13%	2.04%
2 years	12.72%	8.42%	4.29%
10 years	81.94%	49.83%	32.11%

MSCI World Index: Morgan Stanley Capital International's market capitalization weighted index is composed of companies representative of the market structure of 22 developed market countries in North America, Europe, and the Asia/Pacific Region. The index is calculated without dividends, with net or with gross dividends reinvested, in both US dollars and local currencies.

Barclays Aggregate Bond Index: The Barclays Capital U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis.

Supplemental Risk Disclosure for All Potential Investors in Hedge Funds and other private investment funds (collectively, "Alternative Investments")

In connection with your consideration of a direct or indirect investment in any Alternative Investment, you should be aware of the following risks:

Alternative Investments are not subject to the same regulatory requirements or governmental oversight as mutual funds. The sponsor or manager of any Alternative Investment may not be registered with any governmental agency.

Alternative Investments often engage in leverage and other investment practices that are extremely speculative and involve a high degree of risk. Such practices may increase the volatility of performance and the risk of investment loss, including the loss of the entire amount that is invested.

Alternative Investments may purchase instruments that are traded on exchanges located outside the United States that are "principal markets" and are subject to the risk that the counterparty will not perform with respect to contracts. Furthermore, since there is generally less government supervision and regulation of foreign exchanges, Alternative Investments are also subject to the risk of the failure of the exchanges and there may be a higher risk of financial irregularities and/or lack of appropriate risk monitoring and controls.

Past performance is not a guide to future performance and the value of Alternative Investments and the income derived from them can go down as well as up. Future returns are not guaranteed and a loss of principal may occur.

Alternative Investments may impose significant fees, including incentive fees that are based upon a percentage of the realized and unrealized gains, and such fees may offset all or a significant portion of such Alternative Investment's trading profits.

Alternative Investments are offered in reliance upon an exemption from registration under the Securities Act of 1933, as amended, for offers and sales of securities that do not involve a public offering in the United States.

Alternative Investments may themselves invest in instruments that may be highly illiquid and extremely difficult to value. This also may limit your ability to transfer your investment.

Alternative Investments generally are not required to provide their investors with periodic pricing or valuation information.

There may be conflicts of interest between the Alternative Investment and other service providers, including the investment manager and sponsor of the Alternative Investment.

Alternative Investments may involve complex tax and legal structures. Investment in any particular Alternative Investment, or Alternative Investments generally, is only suitable for sophisticated investors for whom such an investment does not constitute a complete investment program and who fully understand and are willing to assume the risks involved in such Alternative Investment. You are urged to consult with your own tax, accounting and legal advisers regarding any investment in any Alternative Investment.

Investors are also urged to take appropriate advice regarding any applicable legal requirements and any applicable taxation and exchange control regulations in the country of their citizenship, residence or domicile which may be relevant to the subscription, purchase, holding, exchange, redemption or disposal of any Alternative Investment.

We refer you to the prospectus for a more complete discussion of the risks relating to an investment in any particular Alternative Investment. You are urged to read all applicable offering materials, including the entire prospectus, prior to any investment in any Alternative Investment. Investment Restrictions apply to many of Goldman Sachs' Alternative Investments. Goldman Sachs Hedge Fund Strategies LLC (HFS) is the Investment Manager to the Fund referenced herein. HFS, a US registered investment adviser, is part of Goldman Sachs Asset Management and is a wholly owned subsidiary of The Goldman Sachs Group, Inc.

There may be conflicts of interest relating to the Fund and its service providers, including Goldman Sachs and its affiliates, who are engaged in businesses and have interests other than that of managing, distributing and otherwise providing services to the Fund. These activities and interests include potential multiple advisory, transactional and financial and other interests in securities and instruments that may be purchased or sold by the Fund, or in other investment vehicles that may purchase or sell such securities and instruments. These are considerations of which investors in the Fund should be aware. Additional information relating to these conflicts is set forth in the latest prospectus for the Fund.

This document has been communicated outside of the United States by Goldman Sachs International, Peterborough Court, 133 Fleet Street, London, EC4A 2BB, authorised and regulated by the Financial Services Authority.

This report may also be communicated in the United Kingdom by Goldman Sachs Asset Management International which is authorised and regulated by the Financial Services Authority (FSA).

Prospective investors should inform themselves as to any applicable legal requirements and taxation and exchange control regulations in the countries of their citizenship, residence or domicile which might be relevant.

Investors should consider that the returns that they will receive will be a function of the share price of the Fund. While we would expect that the Fund would trade substantially in line with its underlying NAV, investors should consider that the traded status of the Fund could lead it to have a significantly higher volatility and correlation to equities.

Investors should consider that the liquidity of their investment will be a function of the market demand for the shares of the Fund. There is the potential for the Fund to trade at a discount to NAV and lack of market demand may lead to their being a less liquid market.
